DETAILED ACTION

Allowable Subject Matter

1. Claims 1-16 and 18-30 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The primary reason for allowance of claims 1-11 is the inclusion of the limitation a series connected resistor and transistor circuit coupled to provide a bias at a source follower input node; and, an amplifier output coupled to a control node of the transistor, the amplifier output thereby driving the source follower via the series connected resistor and transistor circuit.

The primary reason for allowance of claims 12-16 and 18-22 is the inclusion of the limitation a series connected resistor and transistor circuit coupled to provide a bias to a gain stage; and, an amplifier output coupled to a control node of the transistor.

The primary reason for allowance of claims 23-27 is the inclusion of the limitation driving a series connected resistor and transistor pair with an error signal to produce a bias level, and setting a DC operating point of a source follower circuit by applying the bias level to the source follower circuit; and, wherein a transfer function of the electric circuit is characterized by having a pole at a frequency greater than the unity gain frequency of the electric circuit.

The primary reason for allowance of claims 28-30 is the inclusion of the limitation a series connected resistor and transistor pair coupled to produce a bias by controlling the transistor with an error signal; and, a source follower circuit biased by the series connected

resistor and transistor pair; and, wherein a transfer function of the circuit is characterized by having a pole at a frequency greater than the unity gain frequency of the circuit.

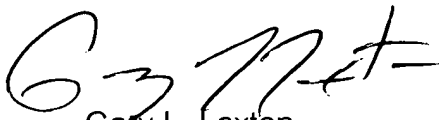

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
